# Economic and Market Commentary September 2022

September brought a slew of global central banks raising rates to combat inflation. Almost every major central bank raised rates during September. The Fed has hiked its policy rate by 300 basis points this year (starting at zero), including the third consecutive 75 bps rate hike delivered at the September FOMC meeting. The median policymaker now expects a 4.50-4.75% Federal Funds Rate at the end of 2023 (we agree), meaning the Fed intends to hit its “terminal” policy rate and to keep rates high longer than most market participants expect (the Fed Funds futures market predicts interest rate cuts in Q3 2023). Fed Chair Powell even specified his view that “real” (inflation-adjusted) interest rates should be well into positive territory “across the yield curve” before the Fed’s job is complete.

The yield on the 2-year Treasury note rose 79 basis points to 4.28%. The yield on the benchmark 10-year Treasury rose 64 bps to 3.83% from the end of August. The yield on the 30-year Treasury rose 49 basis points to 3.78%. Corporate spreads widened in September. Short duration corporates (1-3 year) modestly widened 12 basis points to 88. The unemployment rate rose to 3.7% in August, driven by a 786k jump in labor force participation. The labor force participation rate ticked up to cycle highs of 62.4%. Firms added 315,000 net, new jobs to nonfarm payrolls over the month. Headline consumer prices, as measured by the consumer price index (CPI), registered at 8.3% year-over-year in August. Core CPI, which excludes volatile food and energy prices, printed at 6.3% compared to 12 months ago.

## Florida Trust Day to Day Fund

The Florida Trust Day to Day Fund posted a total gross return of +0.19% in September, versus the benchmark ICE BofA Three-Month Treasury Index return of +0.25%. The fiscal year-to-date total gross return was +0.76%, versus +0.62% for the benchmark. The net 7-day SEC yield of the Day to Day Fund rose 46 basis points to 2.72%, compared to August month end. Comparable prime institutional government funds produced an average yield of 2.50%, following a long period of yielding only 0.01%. While returns remain modest due to low yields available in the market, the Fund continues to provide safety, income, and liquidity of investments of a stable, \$1 NAV Fund.

We continue to diversify credit exposure by investing in corporates, commercial paper (“CP”), asset-backed, and government sectors to maintain diversified sources of high-quality income, with a focus on liquidity. Repurchase agreements (“repo”) utilized in the portfolio currently out-yield similar-maturity short Treasury bills by 30-40 basis points. Bill demand remains high as investors are maintaining cash in anticipation of higher rates. Spread sector allocations will also aid in adding income/yield. As inflation accelerated in 2022 and the market began pricing in more aggressive moves by the central bank, front end rates increased, and ultra-short rates have now diverged. There is now opportunity to target specific types of money markets for their yield or credit advantages, such CP, agency discount notes, or A-1 money market tranches of asset-backed securities (“ABS”). We have been investing in these sectors to build yield over Treasury bills.

The fund remains highly liquid with approximately 48% of the portfolio invested in overnight and short-term securities. Additionally, 32% of the portfolio is invested in government or government guaranteed securities, also enhancing liquidity. The weighted-average maturity of the portfolio is currently 30 days. The fund experienced ~\$94 million in outflows in September, some tied to hurricane/emergency needs for participants. The fund is assigned Fitch rating agency’s highest Money Market Fund Rating of AAA mmf.
